AT THE INSTITUTE FAIR.

MANY INTERESTING ARTICLES SHOWN.

CROWDS OF VISITORS WHO GO TO SEE THE

EXHIBIT. With the present month's close the American Insti sate's sixteenth exhibition will close, and the record accomplishment will take its place. The judges are a session every evening, and the labor performed is important. The standard of judgment is an honest one, and competition in the various departments intuces the presentation of the best efforts of the inventors and manufacturers who seek space in the fair. Whatever may be the difficulties in bringing together an array of exhibits which shall appeal to the popular and be beneficial to every one, the managers of Américan Institute do their work faithfully, and e features of the exhibitions are well maintain

The Institute Pair is something which the mechanic are ready the attractiveness of that department demonstrates itself. Take, for example, the wood-working machinery, considered by itself; the improvements made, the care with which the work is done, the speed with which the patterns are turned out—all betoken the activity which is characteristic of the American chanic, and the hearty encouragement which the American Institute so freely dispenses, with space to the results of invention and an appreciation of effort that stands at its own value. If the fair were not important, the exhibitors would not spend money They do spend money, and the rel exhibits on the main floor of the exhibition hall

in attendance, and as soon as the excitement of canvass shall have subsided, and the torn banners ted candidates shall be taken down, and the itical temperature have gone down to the normal nt, the rural visitor and the city visitor will throng Institute as usual, and go home again, satisfied with result of the visit. There are many notable features exhibition that to discriminate and describe would fill a volume. Familiar as the nephtha launch is to the yachtsman and the pleasure-seeker, the exhibit of m all who go to the Fair. The space, which is on the right-hand side of the main firer, on the outer sageway, is filled with the best productions of the aplete, and another without the cabin, are tures in themselves. The success of the naphtha nch built by the Gas Engine and Power Company t their works at Morris Heights, on the Hariem River is a fact. There are nearly 1,000 of these launches use. The safety, the speed and the economy of ace commend them, and there is no fault found by one who has put them to the test. It is said by those who have tried it that the " real

Vorcestershire Sauce," manufactured by the American ce Company, is one of the finest preparations for table. Its price is one-half that of the European All first-class grocers sell it. None but the nest ingredients are used in its manufacture. The McLeod system of heating and ventilating cars

s a wonderful invention, simple, easily managed, ef-cetive and safe. In the smoke-box of the engine Mr.

is a wonderful invention, simple, easily managed, effective and safe. In the smoke-box of the engine Mr. MeLeod places a coil of steel tabing, with reservoirs, underneath the engine is a large, strong pump, to which proper pipes are connected. Thus cold air is taken in at the front of the engine, drawn back to the pump, forced from there through the coll of pip) in the smoke-box, and then on and around through the cars and back to the pump again. It has remained for the McLeod people to present the best system which has been invented, and the careful tests made, the economical construction, the complete control of the apparatus and the successful demonstration of its efficiency are matters of record.

Professor Parret, the Brooklyn man who has won eclebrity by his origination of the "Lightning Eradicator," is, as usual, on hand at the Fair, telling his own story, and playing the part of benefactor to the visitors, by showing how quickly and well he can readicate greace and remove the stains from any fabric, without injury.

The Brooklyn exhibitors are well represented by Dr. Sidney E. Smith, the manufacturing chemist, who exhibits a new silver depositing polish for household use, and combines with his exhibit a liquid denjifrice, "Albaartar," and another, known as "Albadont," both preparations well-known with the leading druggists.

In a tastefully fitted alcove on the south side of the building, the Gate City's iller on exhibition. Natural stone is the filtering medium, and each vessel a fitted with an ice chamber to cool the water. The reputation of the "Gate City's is well-known, six years' use at home and abroad has proved its value, and absolutely pure water is received in the household by its use.

The Miller's Falls Company, No. 93 Reade-st., show in operation a power hack saw. It cuts bars of steel up to five inches in d'anterer and is a new departure in iron cutting with their star saws.

The fees we fight are Hillism and Tammanyism leagued together to confirm their corrupt and brutal despotism at Albany, and extend it to Washington.-Andrew D. White.

NEW-JERSET SPORTSMEN.

A STRONG ASSOCIATION, FOR MUTUAL PROTEC-

Chatham, N. J., Oct. 29. (Special.)-The Chatham Fish and Game Protective Association is a combi-nation between land-owners, farmers and sportsmen. The association is largely made up of Newark and New-York Owners of estates and farmers in Morris, Essex, Union and Somerset countles, in the towns of Millburn, Livingston, Summit, New-Providence, Sterling, Chatham and Hanover. It will be observed that this territory is in the upper Passale Valley. The land-owners have very generally joined in this associa-tion, and sportsmen therefore take notice that the regulations granted associations of this character will be thoroughly observed. By the New-Jersey statutes every member has the powers of a constable, and can make arrests for shooting in this territory. The shooting is strictly limited to members of the association and

In addition to the protection afforded by the power ments made of special constables by the township committees of the respective townships. In most instances these are farmers located in every part of the territory. They have also employed special game wardens, who will be constantly on duty during the open season of November and December. ciation has been at large expense in stocking these extensive grounds with game birds and has wisely limited the number that can be shot by members. It

is proposed to prevent the destruction of birds as has been done in the past by indiscriminate shooting. It may not be known by non-residents of the State of New-Jersey that, in addition to the heavy fine inflicted for treepassing, the law empowers the seizure of the gun carried by the sporisman. The farmers in this territory have in the past suffered from the destruction of their domestic fowls and animals, breaking down of fences and damage to growing crops to the extent of thousands of dollars. And, in addition to this, roughs in the guise of sportsmen have inflicted serious personal injury upon farmers who objected to trespassers.

The association has ample capital, has retained connect, and among its members are preminent law-yers. Therefore no question exists as to the decisive steps that will be taken in case of any infraction of the law in trespassing upon their grounds. They have advertised in several papers, offering large rewards in addition to the fines levied for trespass, for evidence that will lead to conviction of any one trespassing.

SHE SAYS THE BOY IS HER HUSBAND.

Jacob B. Bloomingthal, of No. 147 East Seventy htrd-st., the brother of Assemblyman Joseph Bloomingthal, appeared at the Yorkville Police Court yesterday, against a well-dressed woman who said she was the wife of his son, Louis. She gave her name as Charlotta Bloomingthal, and said that her malden name was Worthman. Bloomingthal caused her arrest on Friday night on the charge of disorderly conduct, and she was locked up for the night in a cell at the Sixiv-

seventh-st police station. According to the woman, whose face was somewhat bruised, she was married to Louis four years ago, at the United States Hotel, in Boston, without the knowledge of their parents. For the last three years, she said, Louis and herself had been living together at No. 206 West Twenty-fifth-st., where she keeps a boardinghouse. The trouble arose on Friday on account of her being absent from the house when he called. She said that when he found her absent, he packed up ome of his clothes and took them to his father's When they met afterward, he accused her of

andelity and they had some warm words. At 9:30 o'clock on Friday night she drove to her At 9:30 o'clock on Friday might she drove to malleged father-in-law's house, where she met Louis. They again exchanged hot words. He finally ordered her out of the house, and when she refused to leave it, he called his father to the scene. The woman said that the elder Bloomingthal tried to force her out of the house, and in doing so hart her face. He then caused her arrest on the charge of creating a disturbance. Justice Murray fined her \$10, which she paid and hurried out of court.

Commissioner Shields began yesterday his investiga in into the cause of the fire which destroyed the Ameri don into the cause of the fire wind asserting the access ship Francie Tuelter off Bahia, Brazil, on August 30. Thomas Suttle, a scaman, is accused of setting it on fire and he cass made charges that Captain John Frost, of the Nessel, instituted him to commit the act. Captain Frost, who returned to this city a few days ago, is indignant at the charge and bolieves that representatives of the Nessel. al Board of Underwriters have supported the charges next Wednesday night will give descriptive readings hat the inpurance on the vessel and its cargo could not from the "Light of Asia" and other of his poems.

be cellected. Captain Frost attended the examination yesterday and was not arrested.

Robert W. Hanns, the chief inspector of the Board of Fire Underwriters, testilled that when the scamen who had been on the burned vessel returned to this part he examined them all and was told that Suttle knew mere about the fire than any one else did. Suttle consented to tell all that he knew, and implicated the captain in the scheme to set fire to the ship. Heary Dwyer, Christian to tell all that he knew, and implicated the captain in the scheme to set fire to the ship. Heary Dwyer, Christian Kline and other scamen said that they saw Suttle go into the hold just before the fire broke out. Kline noticed that he had a lighted candle in his hand and that he west into a portion of the vessel communicating with the place where the fire originated. The examination was not finished, and no testimony except the cenfession of Suttle tended to connect Captain Freet in any way with the commission of the offence.

WANTS TO PROSECUTE HIS COLLEAGUES.

THE REAL MEANING OF DE LANCEY NICOLL'S AWE-INSPIRING PROCLAMATION.

District-Atterney De Lancey Nicoll sent out from h's office yesterday a remarkable proclamation addresses. To the Electors of the City and County of New-York." It abounds in high sounding and bombastic phraces which come strangely from the pen of a minor city official. Some of the well-known sections of the law referring to the intimidation of voters are quoted from the already widely distributed pamphlets containing in structions to inspectors of election, and after several "whereases" of the most awe-inspiring character, the young official, in imitation of the language of the Pres dent of the United States in his most important proclamations, continues : I'Now, therefore, I, De Lancey Nicoll. District-Attorney of the City and County of New-York, in obedience to the mandate of the statute in such case made and provided, do solemnly direct attention of the electors of this city and county, and of all election officers, to all provisions of said acts, and especially to certain quoted sections. He does "warn all persons that any such unlawful attempts to influence electors, or by bribery, threats menace or intimidation to prevent electors frem exreising the right of suffrage, or to unlawfully delay hinder or interfere with duly qualified electors, or with election inspectors, poll clerks or other election officers will, upon complaint thereof to me, be ferthwith prose cuted to final judgment."

The duty of the District-Attorney to prosecute such

complaints is made imperative by the statute and from any other than a Tammany office this announcement that he would do his duty would be unnecessary. ost important part of the document is that in which Mr. Nicell criticises the usual methods of Tammany Hall and its plans for the future by freely acknowledg ing, that "certain evil disposed persons, for the purpo of partisan advantage, and acting under color of partisan advantage, and acting under color of authority, may attempt by force, menace, intimidation and other unlawful ways to influence electors from giving their votes, and to hinder, delay and embarrass qualined electors in the full exercise of suffrage, and to interfece with, delay and hinder inspectors of election, poil clerks and other election officers in the discharge of their respective duties." As most of the "color of authority" in this city rests with Tammany officials, the meaning of this warning is evident, and Mr. Nicoll's desire to prosecute his fellow-members of Tammany Hall will receive due credit if it is not exhausted before election day.

BREEZE RAISED BY A PROHIBITION ORATOR. Orange, Mass., Oct. 31 .- At a Prohibition rally held here last evening the Rev. J. Wesley Hill, of commented severely upon President Harrison's record and on Governor Russell's position on the Prohibition question. The Rev. George W. Judson, pastor of the Congregational Church, hissed the speaker and was asked to the platform to defend his action. Mr. Judson took the platform, and an exciting debate ensued between the two men. The andience became greatly excited and Mr. Judson's wife fainted. The paster of the Unniversalist Church arose and denounced Mr. Hill and declared that he ought to be made to leave the town. The audience

RAISING A CORRUPTION FUND IN HOBOKEN. An assessment has been levied by the Democratic executive committee upon all employes of the city of Hoboken. The rate for clerks and janitors has been fixed at \$10 and policemen and firemen are expected to contribute the same amount. Many of the employes have refused to pay this money to the ring and there is con-siderable indignation over the assessment. It is believed by men opposed to the ring that the same tactics will be adopted on Tuesday that the ring used last fall, when the declarations that the ballot-boxes had

At Republican headquarters it was said that the strictest watch would be kept up all day and until the last vote was counted at night. The Democratic ring is known to be well supplied with money and has been spending it freely.

THE PAVERS WILL OPPOSE TAMMANY. There will not be many votes for Tammany among the Broadway pavers who are employed by Sub-Con Their outrageous treatment by the Tammany contractor who has the Broadway job has through the summer the men were paid regularly every two weeks. About a month ago swift began to hold turned them against the "Tiger" a back one-half of their wages. Believing that it was for political purposes, the men resolved last Monday tolerate it no longer. Complaint was made to Secretory William McNair of District Assembly Knigths of Labor, who instructed them to strike if they did not get full pay. The men laid their case before Contractor John D. Crimmins, who promised that of the following day they should have their money, but neither Crimmins nor Swift appeared.

On Wednesday the men went to Swift and demanded their money. He declared he had none and immediately every man quit work. In less than twenty minutes had the money and paid every dollar due his The matter has been discussed freely by workmen. The matter has been discussed freely by Knights of Labor and they are in anything but a pleasant frame of mind about it. But for the firm stand taken, the men would still be begging for their money. Secretary McNafr, who has taken a great in the troubles of the pavers, said yesterday: "The men will resent this unjust treatment. It is generally believed that it was for some political purpose that the money was withheld from them."

Alexander G. Fisk, the Republican candidate for Alder-nan in the XXIst District, goes before the voters there man in the AXIst District, goes before the voters there with the highest possible recommendations. He is a young man of energy, integrity and ability. He is a member of the Republican Club, Manhattan Athletic Club, New-York Athletic Club, 7th Regiment Veteran Club, and a member of Company G. 7th Regiment. He is indorsed

HE WOULD MAKE A FINE ALDERMAN.

a member of Company G. 7th Regiment. He is indorsed by the following Republicans: Chauncey M. Depew, Noah Davis, Lucius E. Chittenden, William H. Arnoux, Floyd Clarkson, the Rev. Dr. John R. Paxton, William Rockefeller, Joel B. Erhardt, Seth M. Milliken, George W. Rand, D. Morgan Hildreth, Jr., C. H. Dennison, Albert Bellamy, Sigourney W. Fax, James Talcott, Dr. M. A. Start, I. In the last two years of Tammany government there has been an increase in the net debt of the city of \$6,640,270, and now Tammany is charging on the State Treasury at Albany!

THE TEXAS RAILWAY COMMISSION.

A SAN ANTONIO MAN ALLEGES THAT IT IS DOING GREAT HARM TO HIS STATE.

Chicago, Oct. 31 (Special).—"The harm being done Texas by the Railway Commission, which is only another name for Judge Reagan, can hardly be exaggerated," said William A. Bowen, secretary of the Commercial Exchange of San Antonio, Tex., to-day. "I have had to meet this question at every point in the West and North during the last few weeks. Not only has it crippled the railways in their earnings to such an extent as hardly to justify them in making rates to Texas, as they do to other States, but it is rates to Texas, as they do to other black of a cooring out other capital from developing enterprises that simply await money to make Texas by far the wealthlest and most populous state in the Union. Capitalists, warned by the present anti-corporation craze in my State, are afraid to venture there, not knowing when their interest and principal may both

be cut off from them. 'As an instance of Judge Reagan's blind hostility letters, which he issues quite frequently now, in easwe supposed clamor of his anti-railway constituents of Texas. He personally attacked President Manvel, Third Vice-President Springer and the directory of the Atchison, Topeka and Santa Fe system, charging them with having obtained control of the Gulf, Colorado and Santa Fe in Texas for the purpose of wrecking it and robbing the people of Texas. Yet the facts are that the Atchison system, after five years' control of the Gulf, Colorado and Santa Fe Rallway, have put into it more than \$6,000,000 above what they have got out of it to date, and Judge Reagan and his confreres have recently further cut off over \$200,000 a year of their income. This is the kind of thing that we have to fight in Texas, and the anti-corporation craze comes at the most unfortunate time, to

"The Rock Island, now running into the Panhandle, will soon reach deep water at the mouth of the Brazos via the San Antonio and Aransas Pass road. The Santa Fe already runs directly there, and Abner Taylor, the Farwells and others, who built our magnificent State capitol, have just completed the work of obtain ing eighteen feet of water across the bar at the mouth of the Brazos River. This is the only deep-water port on the Gulf coast, except at New-Orleans, and they have almost completed a road from Velasco to Hempstend, magnificently ballasted, all steel, thoroughly equipped and extending for 150 miles up one of the richest valleys in the world to Hempstead. This line will intersect the International and Great Northern, will intersect the international and Great Northern, the Santa Fe system, the Missouri, Kansas and Texas, the San Antonio and Aransas Pass, the Southern Pacide and the Houston and Central railways, giving them the shortest route directly to the only trans-Mississippi deep-water port on the Gulf."

TRANSATLANTIC TRAVELLERS.

The Inman Line steamer City of Berlin, which arrived yesterday from Liverpool, had among her passengers R. J. Alderton, A. M. De Lonchet, R. J. Hendricks, Lionel Mapleson, Colonel J. M. Whittemore, John A. Le Goss and Philip Warnsley.

Among the passengers sailing on the Cunard steam-ship Etruria for Liverpool, yesterday were John J. Adam, A. E. Buckingham, J. C. Brown, the Rev. James Donnelly, the Rev. Dr. Henry Evans, Dr. P. Gardner Thomas Greenwood, the Rev. R. Crawford Johnson, Nestor Forbes Lennon, the Rev. Dr. William Nicholas, Alexander Stewart, David Fulton Thompson, James Graham Watson, Sir Francis de Wilton and A. M.

The steamship La Gascogne, for Havre, had among her passengers Count C. de Dufort, Count J. de Dufort, Dr. J. M. de Jesi, Mrs. Marcus Daly, A. Duran y Rivas, Dr. Clapham Pennington, Colonel A. Moore, De Witt Parshall and David Speed.

The Arizona, for Liverpool, carried among her passengers Mrs. J. Angus, Miss Jane Buckley, Mr. and Mrs. H. Chubb. F. J. Cooper, Mr. and Mrs. Thomas Collins and family, H. Carns-Wilson, Edward Edgar, Mrs. Martha Huggins, J. H. T. Matthews, William S. Pitcairn, Miss Fanny Shepperd, Miss Anna Spence, Andrew Toway, R. Palmer Tebb and Miss Rose Walsh.

STARTING OFF FOR LIBERIA.

The bark Liberia, which sailed yesterday for foarovia, carried out sixty-eight colonists who will go to settle in the black republic. The colonists are all from Florida. There was a number of colored min-isters among them, Aboard the Liberia were also O. F. Cook, professor of botany; George D. Brownell, professor of mineralogy, and Guy N. Collins, professor of entomology in Sims University, Syracuse, and Dr. Charles Edward Thompson, of the Bellevue Hospital medical staff. They go to Liberia for the New-York State Colonization Society. The party will make an exploration of Liberia, and probably establish an industrial school in Monrovia.

MAYOR GRANT APPROVES THE PLAN.

Mayor Grant's approval was given to the report of the Rapid Transit Commission yesterday, and he affixed his signature to the resolution of the Board of Aldermen consenting to the Commission's system passed on Wednesday. Mr. Grant said that he regarded the plan of the Commission as feasible, com-prehensive and a long step toward accuring real rapid transit for this city. The consent of the property-New-York Cautral.
